NEW DESK OPTION
ASCEND WITH LAMINATE CASING
Privacy and Elegance in your workspace!

ENHANCED PRIVACY

We understand the importance of privacy in your workspace. Therefore, our new Ascend desk includes an elegant modesty panel that not only enhances the aesthetics of your office but also provides you with increased privacy.

DESIGN AND DENSITY

Every detail of the new Ascend desk has been carefully considered to offer you maximum functionality and style. The 2 laminate casing not only provide robust support, but also ensure a new level of distinction.

AVAILABLE IN LOW PRESSURE LAMINATES

BENCHING

We've thought of all possible scenarios. Ascend Benching integrates height adjustability, power, data, privacy and various other features into a single platform—and is available in double-sided configurations for maximum space utilization and flexibility.

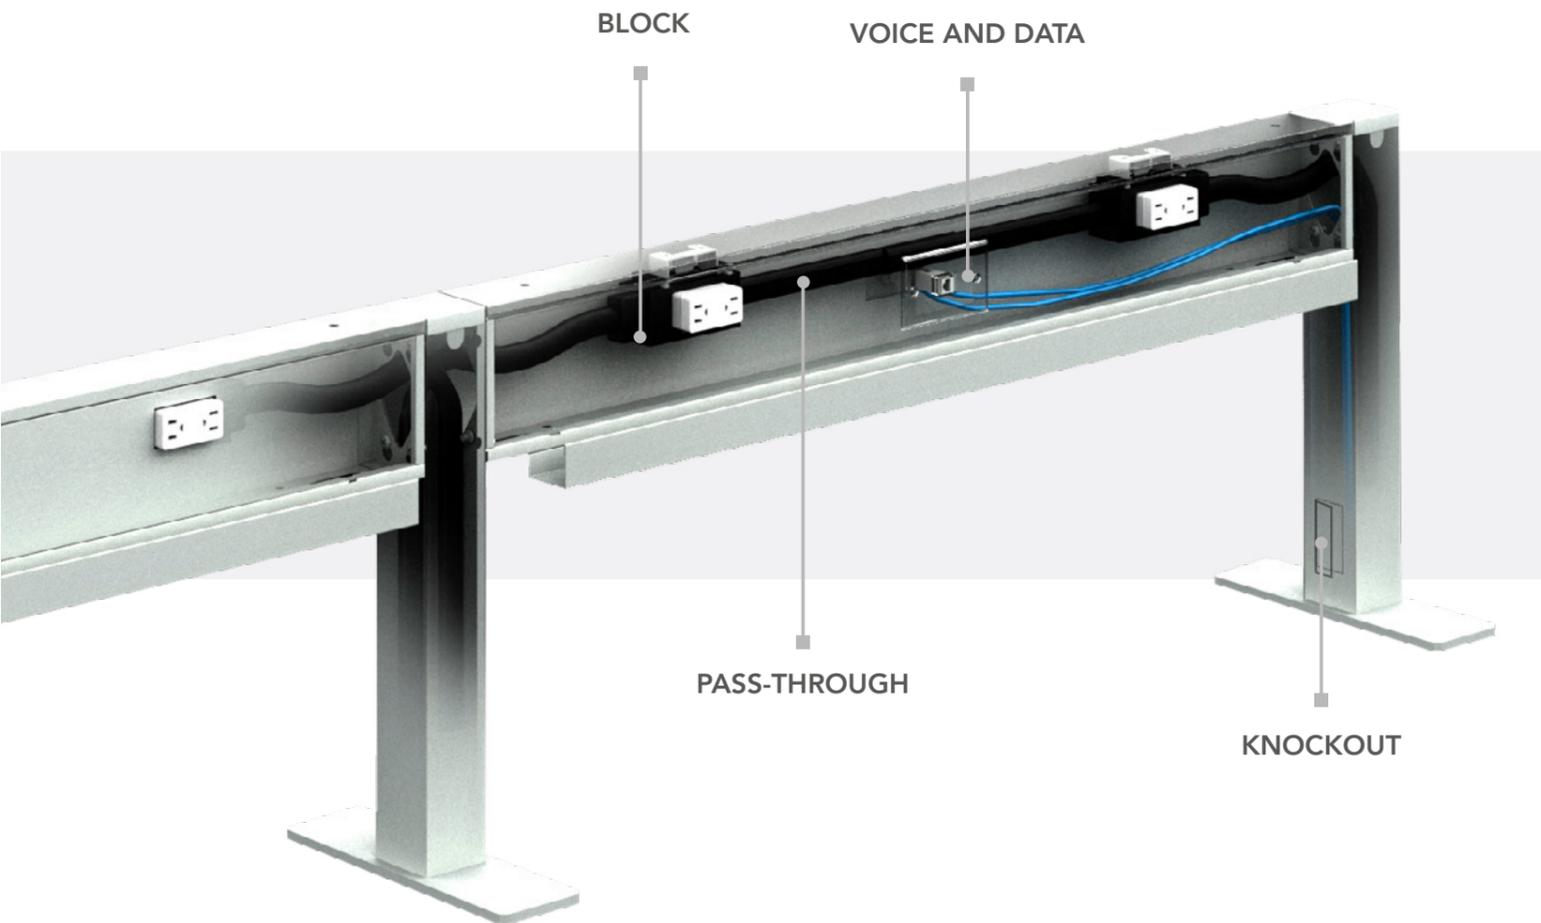

The Ascend portfolio of products allows you to create open, modern and functional office environments. Offering diverse combinations of height-adjustable tables and benching coupled with power/data distribution and storage solutions, Ascend products allow you to maximize efficiency and customize space to your specific needs.

BEAM

Allows straight, 90° and 120° connections in 2-way, 3-way and 4-way configurations.

Hinged raceway to organize and hide cables.

Option to add privacy screens.

3-way configuration
Straight / 120° connection

Need complete flexibility for quick and easy change?

Ascend Beam is a simple elevated power and data distribution product used in conjunction with ASCEND tables and any Gebesa desking, storage or table series. The freestanding modular design also makes it easy to integrate into other areas of your office, including lounge, café and other collaborative areas where power and data distribution or privacy is needed.

2-way configuration
Straight / 90° connection

Application Guidelines.

Furniture color may vary from images.

GUIDELINES

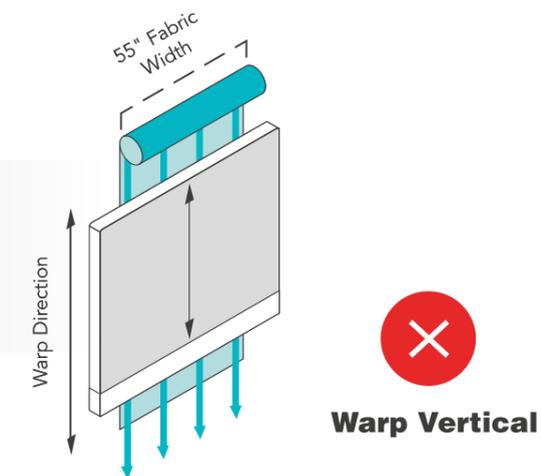

Fabrics that are **patterned, textured, or have sheen** can have a **distinctly different appearance if applied in different directions on chairs or panels**. Because of these differences, as well as width limits to how some fabrics can be applied to Gebesa products*, it is important to understand fabric applications.

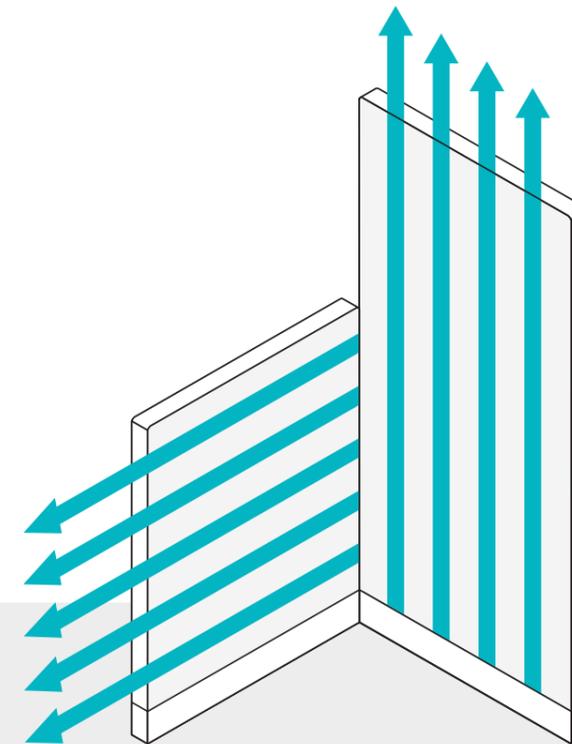

Fabrics **cannot be applied warp horizontal/railroaded** on panels with a **height greater than 48 inches** because panel height is greater than fabric width.

Fabrics **cannot be applied warp vertical** on panels with a **width greater than 48 inches** because panel width is greater than fabric width.

Gebesa is not responsible for charges associated with replacement or reupholstering of products due to incorrect fabric specifications.

The combination of tall panels (height of 55 inches or more with warp vertical/off the roll) with short panels (height of 45 inches or less with warp horizontal) results in fabric patterns running in opposite directions.

The following options are available:

- Use solid or non-directional fabrics.
(Various Gebesa fabrics are noted as "non-directional.")
- Specify warp vertical/off the roll application for fabrics that are standard warp horizontal.

If you require warp vertical and it is not standard for your fabric choice, you must specify the warp vertical option on each line of the order.
