# G-BENCH

The G-Bench collection allows your team to collaborate out in the open. With technology integration and wire management paired with polished design options and finishes, G-Bench brings modularity and style to your space.

# BENCHING MULTIUSER

G-BENCH

## RECTANGULAR LEG

Our table increases capacity for collaboration by creating a perfect space for furniture, technology and people to coexist while being totally autonomous. It has hidden wiring and a practical design to address your spatial needs.

## "U" LEG

The table acquires a classic style with the integration "U" legs. It remains faithful to its objective of optimizing spaces and promoting dynamism.

Access door with scallops will help you maintain perfect order and eliminate visual clutter.

## HEIGHT-ADJUSTABLE LEG

Dynamism in its purest form. The adjustable leg table achieves the highest level of adaptation. Created with the flexibility to adapt the height during its installation, it adapts to the needs and workstyle of your company.

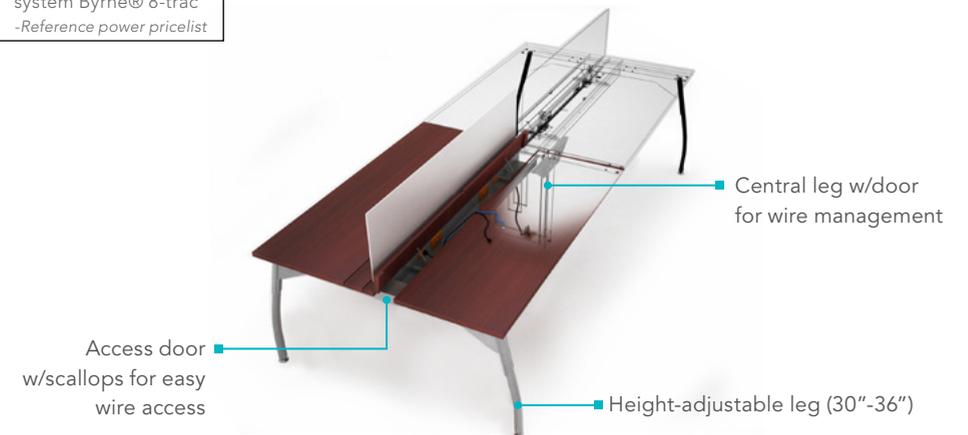

## ADDITIONAL MODULES FOR TABLE

Always flexible and efficient. Maintain a space that's open to change. Adapt multiuser extensions on each table to extend them when you need more workstations without having to change your furniture.

## POWER AND DATA SYSTEM

# BOOKCASES

## HUTCH

Set the open bookcase on your central workspace and take advantage of its interiors to improve the overall look of your office.

Easily access items and save time. Its minimalist and sophisticated design creates a clean style that inspires the flow of ideas and increases productivity.

## HANGING BOOKCASES

### OVER WORK SURFACE

The design of the open bookcase over work surface is the perfect furniture accessory.

It has 2 large compartments that allow you to store either decoration or documents.

### BELOW WORK SURFACE

Avoid a saturated environment with the integration of a bookcase below work surface.

# CABINET

G-BENCH

Made of solid particle board with laminate on both sides, the G-Bench Personal Cabinet is a rugged and innovative storage option.

This is an innovative storage option which takes up little space and maximizes storage capacity.

# GUIDELINES

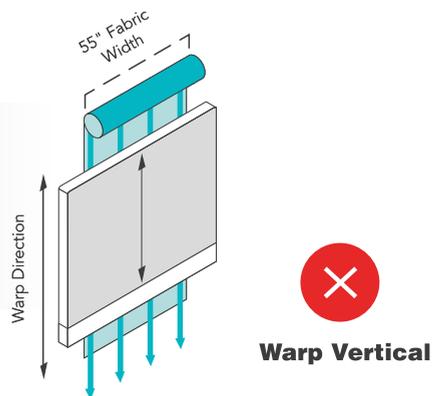

Fabrics that are **patterned, textured, or have sheen** can have a **distinctly different appearance if applied in different directions on chairs or panels**. Because of these differences, as well as width limits to how some fabrics can be applied to Gebesa products\*, it is important to understand fabric applications.

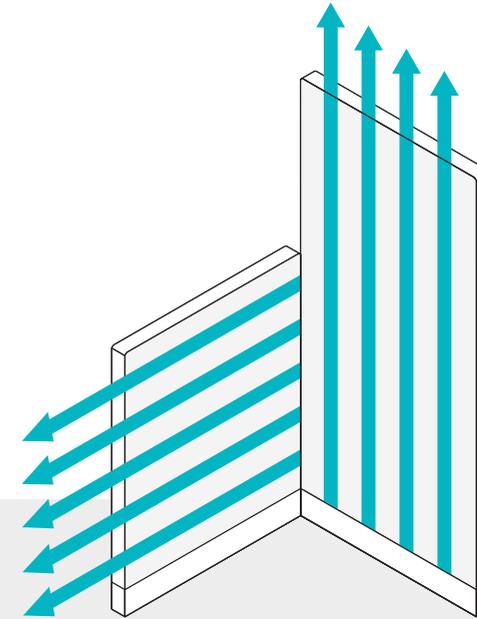

Fabrics **cannot be applied warp horizontal/railroaded** on panels with a **height greater than 48 inches** because panel height is greater than fabric width.

Fabrics **cannot be applied warp vertical** on panels with a **width greater than 48 inches** because panel width is greater than fabric width.

*Gebesa is not responsible for charges associated with replacement or reupholstering of products due to incorrect fabric specifications.*

The combination of tall panels (height of 55 inches or more with warp vertical/off the roll) with short panels (height of 45 inches or less with warp horizontal) results in fabric patterns running in opposite directions.

### The following options are available:

- Use solid or non-directional fabrics. (Various Gebesa fabrics are noted as "non-directional.")
- Specify warp vertical/off the roll application for fabrics that are standard warp horizontal.

If you require warp vertical and it is not standard for your fabric choice, you must specify the warp vertical option on each line of the order.
