GUIDELINES

Fabrics that are **patterned, textured, or have sheen** can have a **distinctly different appearance if applied in different directions on chairs or panels**. Because of these differences, as well as width limits to how some fabrics can be applied to Gebesa products*, it is important to understand fabric applications.

Fabrics **cannot be applied warp horizontal/railroaded** on panels with a **height greater than 48 inches** because panel height is greater than fabric width.

Fabrics **cannot be applied warp vertical** on panels with a **width greater than 48 inches** because panel width is greater than fabric width.

Gebesa is not responsible for charges associated with replacement or reupholstering of products due to incorrect fabric specifications.

The combination of tall panels (height of 55 inches or more with warp vertical/off the roll) with short panels (height of 45 inches or less with warp horizontal) results in fabric patterns running in opposite directions.

The following options are available:

- Use solid or non-directional fabrics. (Various Gebesa fabrics are noted as "non-directional.")
- Specify warp vertical/off the roll application for fabrics that are standard warp horizontal.

If you require warp vertical and it is not standard for your fabric choice, you must specify the warp vertical option on each line of the order.
